Modified and reordered according to 2006 Help Command List from MFD, Navigation Quick Reference Guide and actual use.

Strikethroughs indicate commands I could not get to work.

Italics are comments about usage.

To get out of Compass Mode: “Previous Destination”, “Enter Destination”, “Map”, “Turn by Turn Guidance”, “Single Map”, “Delete All Destinations”, “Yes”.

“Track Down” and “Previous Track” never do take you to the previous track. The commands take you to the start of the current track.
